

Coyotes Sophia

Appearance

Coyotes are usually gray or brown but if they live in the desert they have lighter fur. The lighter fur helps them keep cool in the desert. Coyotes also have long bushy tails, long legs so they can run fast, and big pointed ears so they can hear a lot.

Habitat and Diet

Coyotes are big animals so they need lots of food to eat. They will eat rabbits, mice, lizards, and snakes. Coyotes will also eat nuts, fruit, and any dead animals that they can find.

Adaptations

In the summer coyotes have a lighter coat because that helps them stay cool. They also have long legs so they can leap away from predators. Coyotes have great hearing because they have big ears.
