

Coyotes

By Joshua & Connor

Appearance

Coyotes have big and pointed ears that look sharp. They have gray fur in some spots. Coyotes can hear other animals walking.

Life Cycle

Coyotes have their pups in spring in a den and about 6 pups are born in the den.

Diet

Coyotes eat solid food. Baby coyotes get milk from their mom. Baby coyotes get warm milk in the day and the night.

Interesting Facts

Coyotes eat other animals with their small mouth. Coyotes have really sharp teeth. Coyotes can change what they do, what they eat and where they live. Wolves are way stronger than coyotes.
