

Frogs

By Owen B

Appearance

Frogs have long back legs.

You may see a frog with big sharp eyes and stripes.

Habitat and Die

Frogs eat lots of fish, flies and other things.

Plus they will eat anything that fits in the mouth.

Life Cycle

Frogs start in eggs called frog spawns.

In 7-15 weeks the tadpoles will hatch.

Adaptations

Fish eat lots of tadpoles.

Wolf spiders also eat frogs.

Birds eat lots of tadpoles a year.
