

RABBITS AND THEIR BEHAVIOR

Appearance

Most rabbits have brown fur. Also half of the rabbits in the world have pink ears. Some rabbits have pink feet.

Habitat and Diet

Rabbits mostly live in brushy countries.

They are vegetarian eaters and eat throughout the year.

Adaptations

The natural predator of the rabbit is the dog, weasels, foxes, raccoons, people, cats, hawks, owls, and eagles. But the prey of the rabbit is grass, tree bark, plant roots, and droppings.

Life Cycle

A doe can have more than 20 kittens in 1 year! A male rabbit is called a buck. But a female is called a doe. Finally a baby is called a kitten.
