

Raccoons by Thomas

Appearance

Raccoons live in hollowed out trees near lakes and streams. They live in homes called dens. Raccoons have a black bandit like face.

Habitat and Diet

Raccoons eat fruit, nuts, berries and insects. Raccoons will also eat fish if it can catch it.

Life Cycle

Raccoons are born with 4 to 6 siblings. Then they hunt food at 9 to 12 weeks.

Prey

The raccoon eats frogs, fish and eggs. They will also eat rodents.

Raccoons are called "Omnivores" in Latin that is Omni which means "all".

Interesting Facts

Did you know raccoons have thousands of nerves ending at their hands and feet.
