

Raccoons

by Alyssa, Molly, and Trinity

Appearance

Did you ever notice that raccoons have black rings around their tails and if you look carefully it looks like they have a black mask around their face. They are also gray and black. If you look at their feet they look like cat feet.

Habitat and Diet

Do you know where raccoons live? Well, we do! They live in hollow trees. Do you know what they eat? They eat frogs, plants, and fish.

Life Cycle

Did you know that raccoons are mammals? Mammals have fur. Raccoons make milk for their babies.

Adaptations

Do you know raccoons are nocturnal? Raccoons are also camouflaged most of the day.

Interesting Facts

Did you know raccoons have bushy tails? They also make hisses, whistles, screams and growls. Do you know what they eat? They eat frogs, fruits, nuts, berries, insects, crayfish, and corn.
