

Red Fox

by Jackson and Matthew

Appearance

Red foxes have whiskers. Red foxes have extra strong senses. They have long pupils instead of round ones. They can smell old paw prints of a dog.

Habitat/Diet

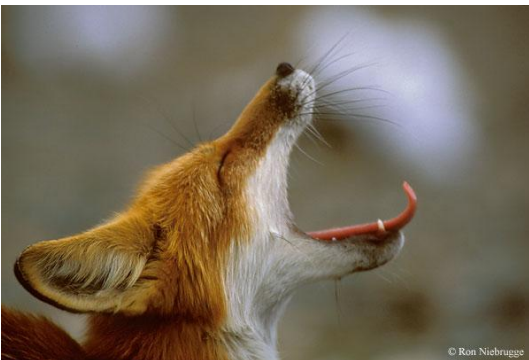

Foxes live in meadows, farms, fields, parks, woodlands, and open spaces.

Adaptations

Red foxes have waterproof fur that can keep them warm in snow.

Life Cycle

Parents of baby red foxes raise their babies in underground dens. In one year they can have four to nine cubs.

Interesting Facts

Red foxes have bushy tails. It is a nocturnal animal.
