

Skunks

by Heath

Appearance

If you see a furry black and white thing with a long tail you will see a skunk. Skunks do have claws but the reason you don't see them is because they're really small. Skunks also have a pink nose.

Adaptations

A skunk may be used to food and flowers but that doesn't mean it's used to you.

Habitat and Diet

Skunks live in the U.S.A. Skunks can eat many things. They can eat reptile eggs, insects, trash and even bats. They can also eat plants and meat.

Interesting Facts

A skunk can make its spray go far by doing a handstand. A baby skunk only weighs as much as ten marshmallows .

Life Cycle

When the mother skunk has a baby just born the baby skunk is deaf and blind.
