

Squirrels

by Brayden & Isaiah

Appearance

Squirrels have brown, red and gray fur, with black eyes, short legs, and sharp claws.

Habitat and Diet

Squirrels live in the trees and the ground in burrows. These are their habitats.

Adaptations

Squirrels have lots of predators like foxes, hawks and owls.

Life Cycle

Squirrels have warm blood. They have backbones, big front teeth, and they are mammals.

Interesting Facts

Squirrels can GLIDE and eat nuts. The squirrels mate in the winter season. In the summer month, they have babies.
